DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hassbrouk (USPN 3,001,726).

Hassbrouk discloses a system for cooling a rocket motor combustion chamber (4) including a plurality of tubes (8) which discharge into a torroidal coolant-collection manifold (10). There are a plurality of vanes (28) where the coolant flow from the tubes enter the manifold. The purpose of the vanes is to reduce pressure loss and increase pressure uniformity (col. 1 lines 15-22).

Allowable Subject Matter

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Coburn and Fint et al disclose coolant collection manifolds.
